1. Documentation Home

The Horizon3.ai documentation provides everything you need to deploy, configure, and maximize the effectiveness of NodeZero®, our autonomous penetration testing platform. Whether you're a security analyst, system administrator, or DevOps engineer, you'll find step-by-step guides, integration instructions, and troubleshooting resources to help you identify, prioritize, and remediate weaknesses across your environment. Get started with NodeZero® today and take a proactive approach to securing your infrastructure.

NodeZero® | Essentials

QuickStart

Set up your account, create a host, and run your first pentest in just a few steps.

NodeZero Portal

Explore NodeZero Portal capabilities, including penetration testing, compliance, and advanced features.

Premium Add-Ons

Unlock NodeZero's premium add-on features to elevate your security testing with deeper insights and more powerful tools.

2. Quickstart

2.1 Quickstart Guide for NodeZero®

Ready to strengthen your security? Set up your account, create a host, and run your first pentest in just a few steps!

Getting Started

Get up and running with NodeZero quickly by following this step-by-step guide. You'll learn how to set up your account, create a host, and run your first penetration test, giving you immediate insights into your security posture. Whether you're new to penetration testing or an experienced security professional, this guide will help you deploy NodeZero efficiently and start identifying and prioritizing weaknesses right away.

WHAT'S NEEDED TO RUN YOUR FIRST PENETRATION TEST?

To perform your first pentest with NodeZero, you'll need to:

1. **Log in or register an account**

   Use an existing account, or register a new NodeZero account and log in to the platform.

2. **Network Requirements**

   Check network prerequisites for NodeZero to work properly.

3. **Setup NodeZero host**

   Deploy a NodeZero host inside your network to perform internal security assessments.

4. **Run internal pentest**

   Run a test, let NodeZero uncover weaknesses, and review the findings.
